

Are You looking for career in Biomedical / Medical engineering domain?
Are You planning for higher studies in Biomedical / Medical engineering stream

Training offered:

Biomedical Signal Processing

Real time Acquisition of biological signals like ECG, EMG, EEG, processing of these signals, developing applications on these signals using industry standard tools.

Medical Image Processing

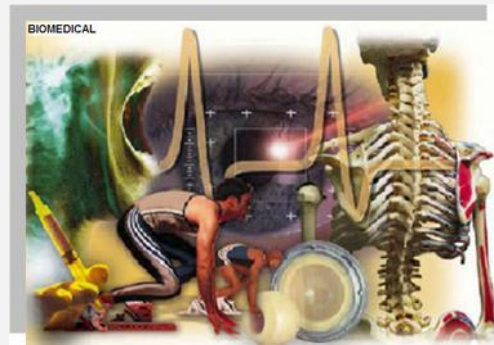

Understanding Image Processing fundamentals, implementing different algorithms in enhancement, compression, segmentation, developing applications for medical images

Digital Signal Processing

Fundamentals of DSP, Advanced DSP concepts, Algorithm design implementation, working on DSP processor platform

Overview:

The purpose of this training is to create employment and higher studies opportunities for graduates in Biomedical / Medical Electronics / Electronics & Instrumentation

Please email us or call us or meet us in person to know more about the courses.

itie Knowledge Solutions

934, 2nd Floor, 17th Main Road,

Rajajinagar 3rd Block

BANGALORE - 560010
